

AI Heart Disease Risk Prediction Report

AI-Based Heart Disease Risk Prediction System

Patient Information

Patient Name	Not Found
Hospital Name	HEART CARE DIAGNOSTICS
Report Date	Not Found
Age	52
Gender	Male
Blood Pressure	150
Cholesterol	245
Blood Sugar	High
Heart Rate	98
Chest Pain	0
Rest ECG	1
Exercise Angina	1
Oldpeak	2.3
ST Slope	1

Prediction Result

High Risk of Heart Disease

Risk Probability: 54.02%

Risk Level: High Risk

Recommendations

- Consult a qualified medical professional for further evaluation.
- Monitor blood pressure regularly.
- Maintain healthy cholesterol levels.
- Follow a balanced and heart-healthy diet.

- Exercise regularly according to medical advice.
- Avoid smoking and other harmful habits.
- Follow the recommendations provided by your doctor.

Prediction Model Information

The prediction is generated using a trained Random Forest machine learning model based on 11 clinical input features.

Input features include age, sex, chest pain type, resting blood pressure, cholesterol, fasting blood sugar, resting ECG, maximum heart rate, exercise-induced angina, ST depression and ST slope.

Medical Disclaimer

This report is generated by an AI-based prediction system for educational and research purposes. The prediction should not be considered a medical diagnosis. Patients should consult a qualified healthcare professional for proper medical evaluation and treatment.
